Pilot proposal · draft for discussion · 30 Oct 2026

AI check-ins and the exception workflow for Lakeside Care Partners

Prepared for [sponsor], VP, Care Operations · by Cureloom

Why

APCM pays a flat monthly amount with no time requirement, so its margin is nurse time per patient. Today a care manager covers about 350 APCM patients, about 20.0 nurse minutes per patient-month. Cureloom places each month's check-in by phone in the practice's name and hands your nurses only the patients who need a person. Your nurses stay; they work the exceptions.

What we'll run

1. 500 APCM patients at two or three client practices, for 90 days from 16 Nov 2026 to 13 Feb 2027.
2. A monthly AI check-in for every consented patient: medications, symptoms the care plan watches, ER visits, readings, and what they need.
3. Concerns go to the patient's care manager; urgent symptoms get 911 or 988 advice, a live transfer to the on-duty nurse and an alert to the practice.
4. A billing pre-flight each month end, with an audit packet for every billed patient-month.

Timeline

16 Nov 2026 – 29 Nov 2026	**Set-up and baseline.** BAA signed; roster export; your compliance team approves the scripts, consent language and calling number; baseline nurse minutes measured on today's workflow.
30 Nov 2026 – 23 Jan 2027	**Live.** Check-ins for the cohort, exceptions to your nurses, a 30-minute metrics review every week, the pre-flight at each month end.
24 Jan 2027 – 13 Feb 2027	**Read-out.** Results against every target, the audit packets, and a decision on conversion.

Success criteria

Measure	Target	How it's measured
AI check-in completion	≥ 60%	AI-eligible pilot patients reached within 3 tries each month
Nurse minutes per APCM patient-month	≤ 14.0 min (30% below 20.0)	Timers on every nurse activity, against the set-up baseline
Patients who ask to stop AI calls or switch to a person	≤ 15%	Opt-out and “asked for a person” records
Urgent escalations acknowledged within 30 minutes	100%	Raised and acknowledged times on every urgent flag
Billed months with a complete audit packet	100%	Consent, eligibility, contacts, time, note and attestation for each

Commercials (proposed)

- Pilot: 500 patients × $2.00 per patient a month × 3 months = **$3,000**.
- If every target is met: $4.00 per APCM patient a month, expanding to 3,000 patients, **$144,000 a year**.
- At the minutes target, the nurse time saved across the cohort is worth about $4,140 a month at $1.38 per loaded nurse minute.
- Either side can end the pilot with 14 days' notice.

Cureloom provides

- Check-in calls in each practice's name, with its number
- The exception queue and nurse call workflow
- The monthly billing pre-flight and audit packets
- A weekly metrics review and a named implementation lead
- A BAA and answers to your security questionnaire

Lakeside Care Partners provides

- A sponsor and 1–2 care managers for the cohort
- A monthly roster export (CSV)
- Compliance sign-off on scripts, consent language and the calling number
- A physician champion at each pilot practice
- 30 minutes a week for the review

Not in scope

EHR integration (the roster comes in as a CSV; the monthly note goes out as text). Claim submission: each practice bills under its own NPI through its own biller. Clinical decisions: the AI asks scripted questions and routes; beyond 911 or 988 it gives no advice. Check-ins in languages other than English: those patients get a nurse call.

Letter of intent (non-binding)

Lakeside Care Partners intends to run the pilot described above with Cureloom, starting on or about 16 Nov 2026, subject to a business associate agreement and a final pilot agreement. This letter records intent only. It is not a binding commitment by either party, and either party may decline to proceed.
